RefToken ICO step-by-step guide

This step-by-step guide will walk you through the whole process of investment, starting from the registration.

Start off by visiting the Signup page by clicking **Invest** button. If you already have an account, click **Log in** and skip forward, otherwise, keep reading.

Should you already have an account, but be locked out of it, there's also an option of **recovering** your account.

First of all, please double check the domain name. It should be https://ico.reftoken.io should the domain differ, please DO NOT use this website and inform us ASAP.

The registration process is quite standard: you need to fill in all the fields and come up with a password (it is recommended that your password is at least 8 characters long and include letters, both upper and lower case, digits, and symbols and be one that has never been used before), try come up with something that will take centuries to crack (like in our example below)

REFTOKEN

REGISTRATION

RefToken

TestWallet

•••••••••••••••

Well done! It would take about centuries to crack this password

•••••••••••••••

☑ I have read and agree with Terms and Conditions and confirm that I'm NOT the US citizen

Create account

Already have an account? Log in

Now, press **Create Account**.

Now go to the inbox of the email address you registered with and look for an email from us.

WE HAVE SENT AN EMAIL TO

YourEmail@Gmail.com

Please follow the link in email to activate your account.

Please follow the link in the to activate your account

Hello RefToken,

Thank you for registering.

Please follow the link to activate your account:

http://ico.reftoken.io/user/signup/confirm-email/

Best regards,
RefToken team

It will take you to the **Login** page, where you'll have to use the email and password you registered with in order to access your profile (see the first picture of this guide).

At this point, you'll have to provide your phone number to set up 2FA. You can choose your country code in the menu and then complete the rest of the digits. A confirmation code will be sent to this number, so please use a number you have access to. This phone number will also be required in case you have to recover your account in future.

CONFIRM YOUR PHONE NUMBER

Send code

Didn't receive the code? Request SMS again.

You can receive the 2FA token via an automated phone call

After you've submitted your phone number, you'll receive a text message with a code which you need to type in the appropriate field. In the event that you haven't received the code, you can **request the SMS again.** In this instance, use the code which you've received last.

You can now deposit to your wallet.

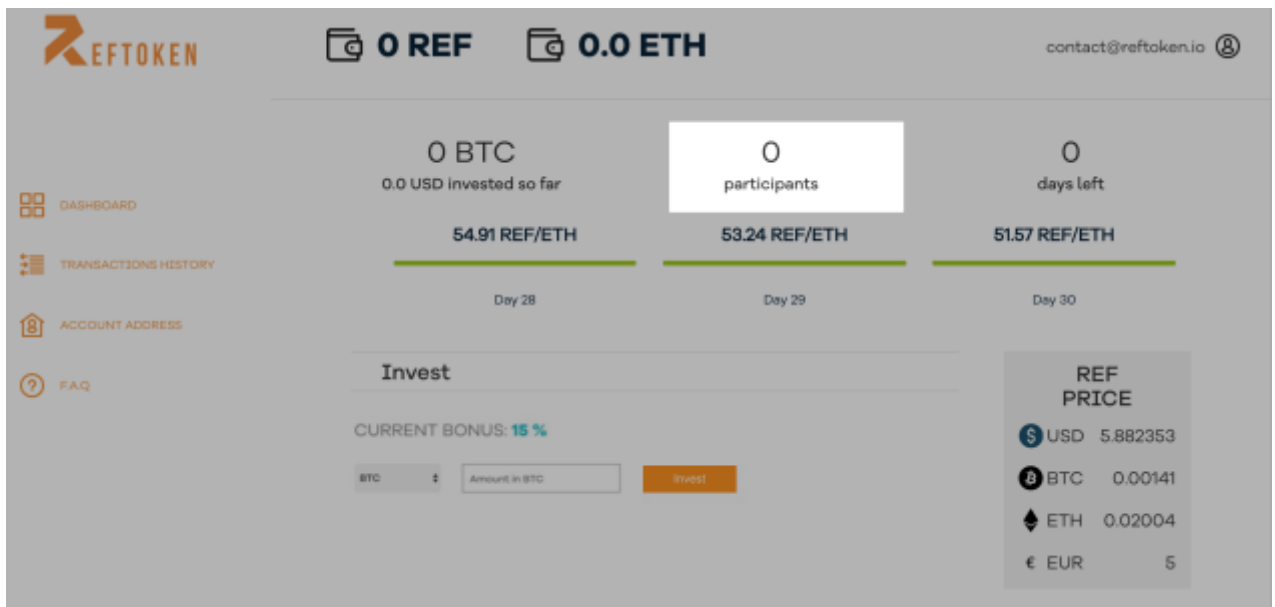

You are now logged in to your wallet, let's explore it

To start with, there's the **Dashboard** where you can find most of information you need to know about our ICO
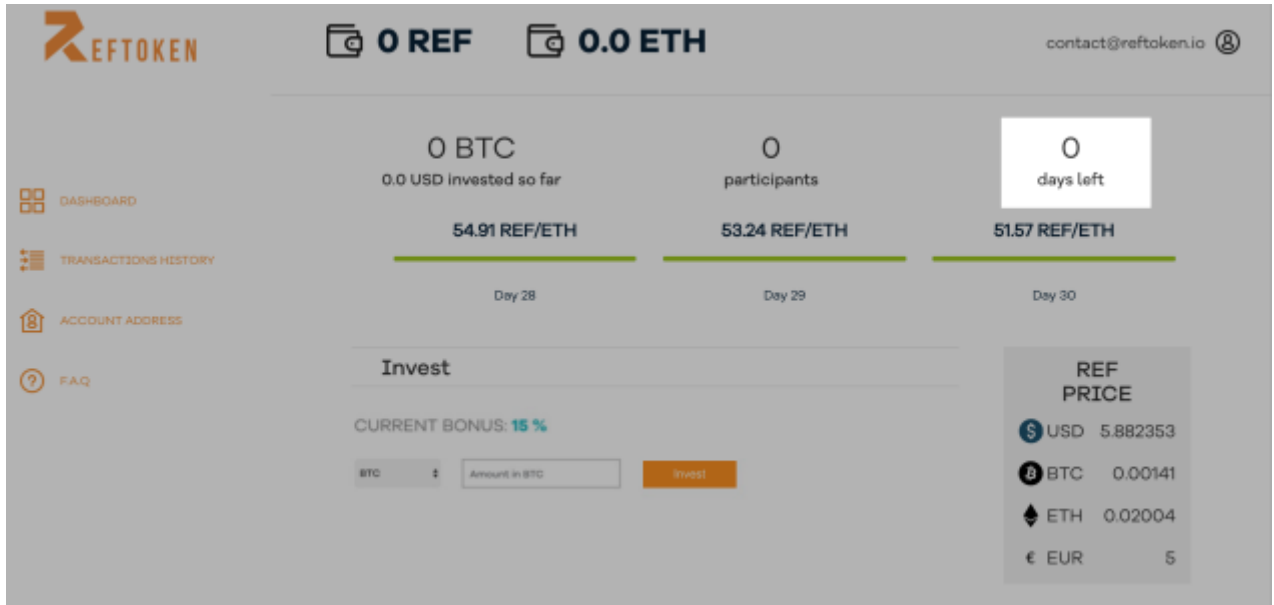

Here the amount of investments RefToken has acquired is highlighted.
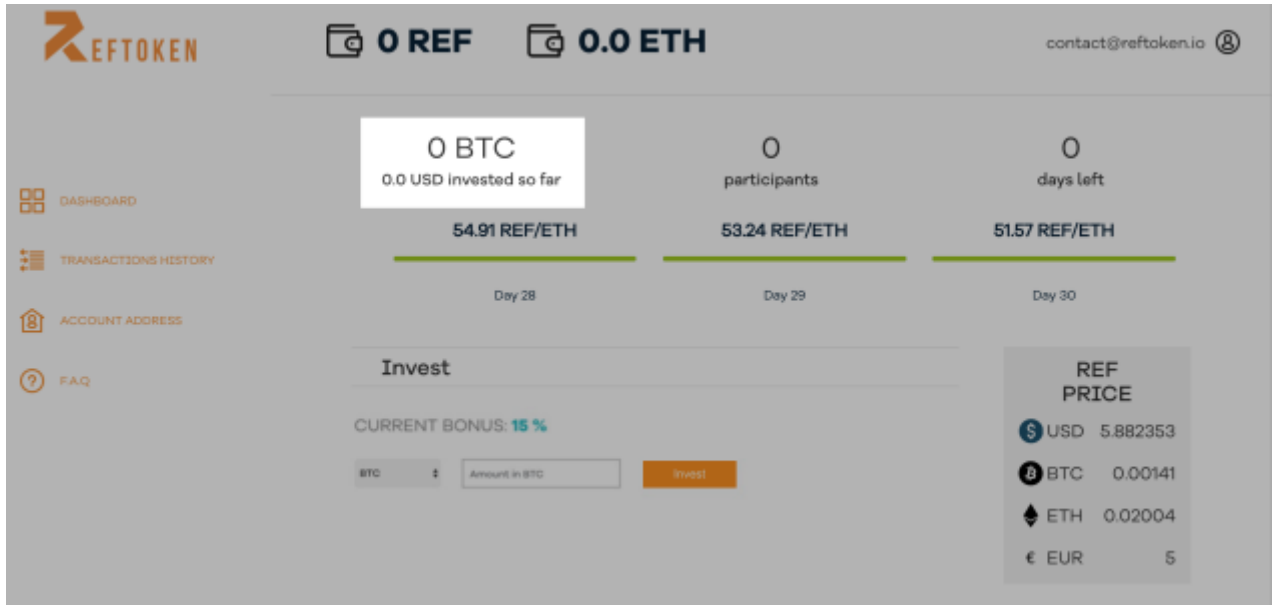

You can also see the number of participants.

And the number of days left till the end of the ICO.

Please note that all numbers above are just for illustration. These indicate the amount invested in the current project with its equivalent in US dollars, the number of people who have already invested and the number of days left till the end of the ICO.

The progress of an ICO and the bonus amount you'll receive if you invest at this stage can be seen on the green bars.

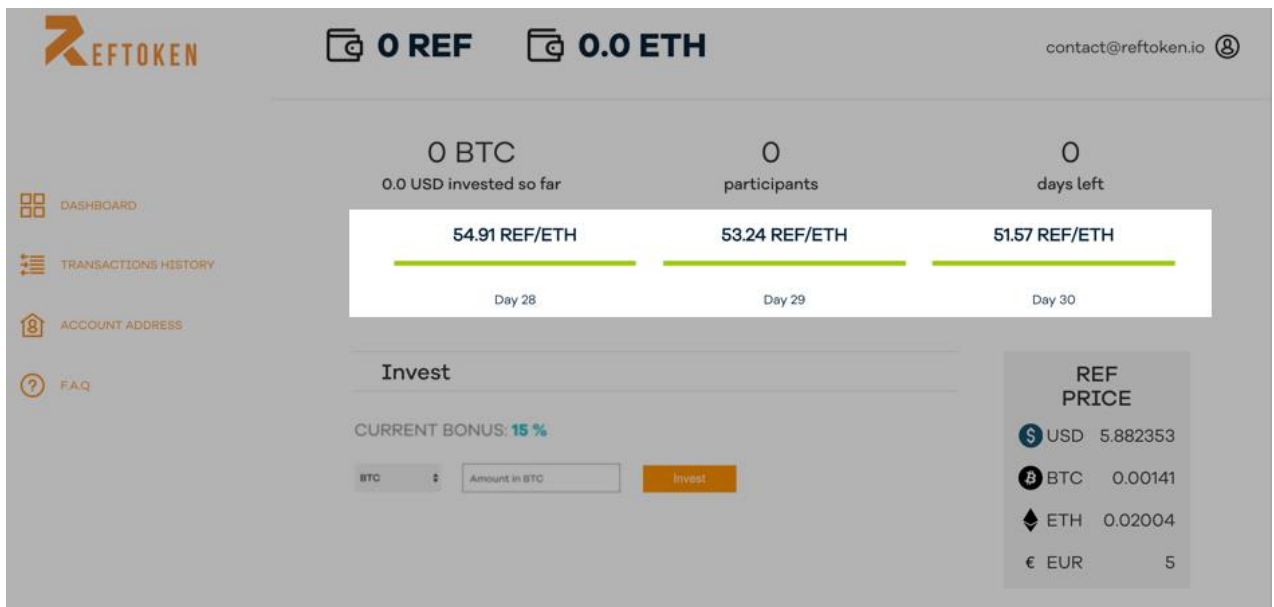

You can also see the current bonus level in the **Invest** area.
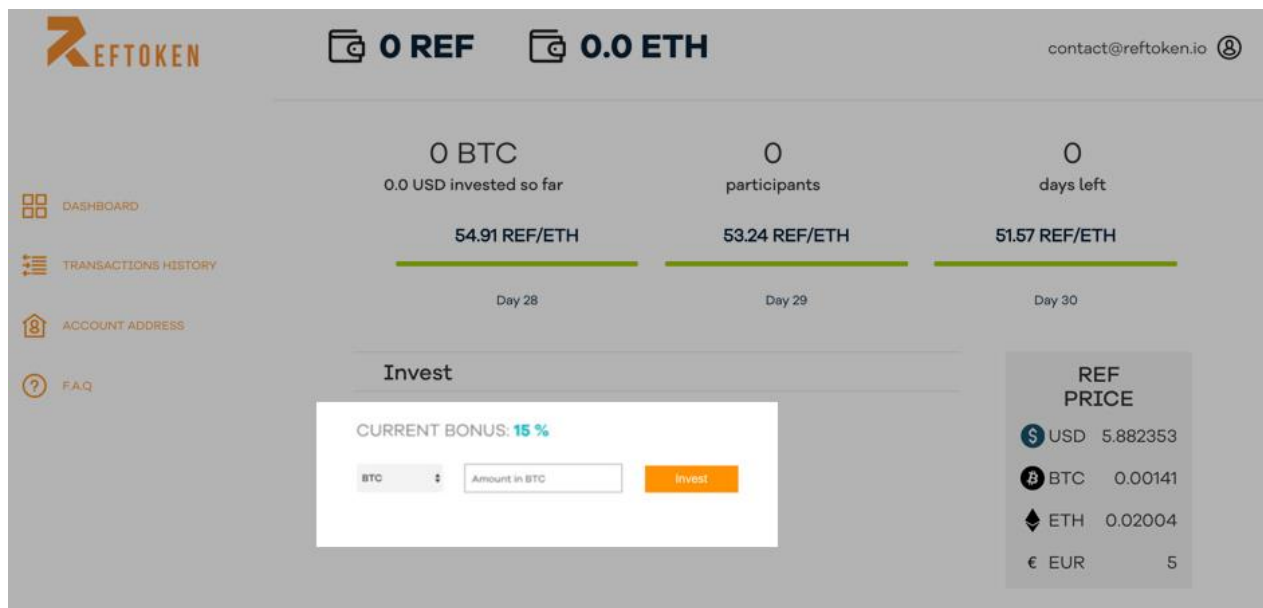

It is possible to invest via BTC, ETH or wire transfer; the full list of currencies is available in the dropdown menu. After you choose the currency you would like to contribute in, you need to enter the amount you'd like to invest. Then, click **Invest** to perform the action.

Exchange rates are available in **REF Price info** block. So, you can always check the current price per 1 REF token.
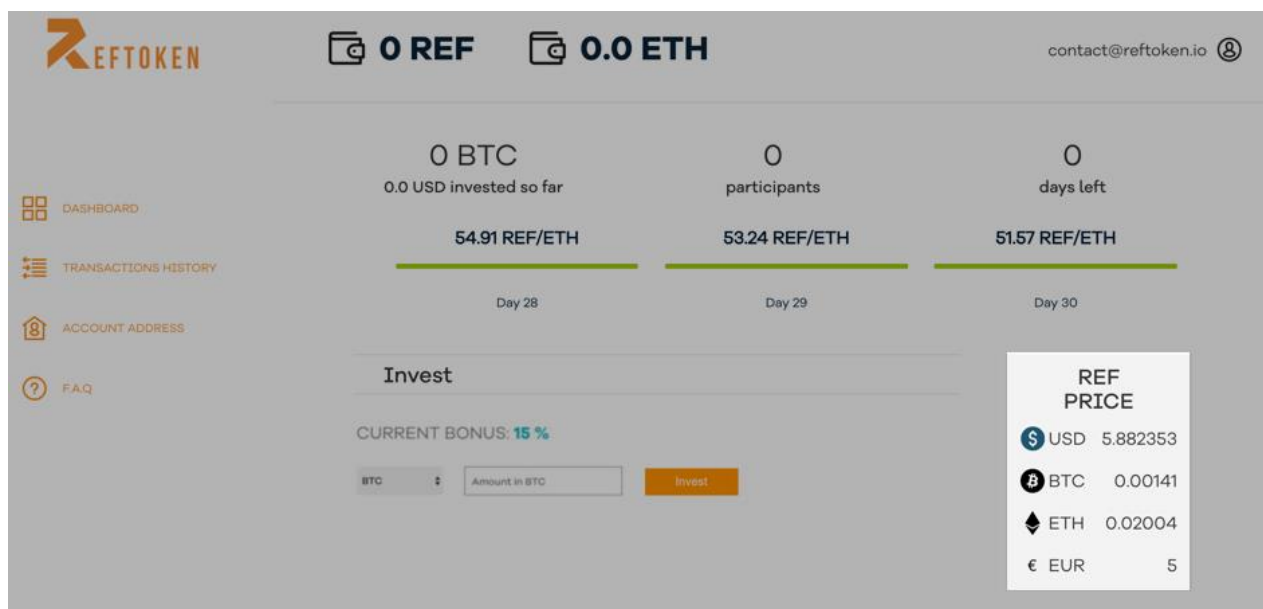

That was a description of your **Dashboard**. Let's have a look what else the menu has to offer.

You can view the list of the transactions you've made and their status in **Transaction history**

Another important piece of information is your **Account address**.
It contains your wallet address which should be used for REF token storage only. Don't send Ether or other cryptocurrencies to it! If you did, please contact support, but they're probably lost.

This screen also features your referral link and code, which will award you with a 5% bounty for any contributions generated by that link.

You can also use the displayed QR code to copy or share your account address.
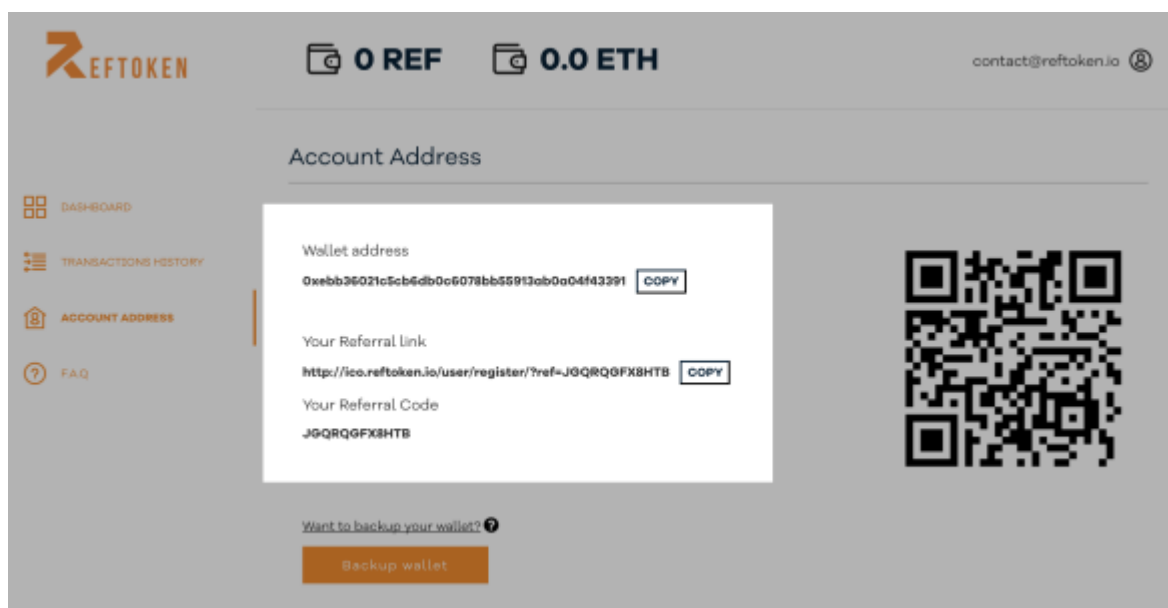

You can also **backup your wallet**. To get further instructions on how to do this, press "?".

After your press the **backup wallet** button, an email with further instructions will be sent to you instructing you on how to complete this process.

The Send menu (not visible in this image) is used to withdraw the tokens you've bought to external accounts. **This will be deactivated until the end of the ICO.**

Now that you know the details, let's see how investing actually works. Say, you'd like to invest **1 BTC**.
- You choose the ETH as your currency.
- Enter 1 as an amount of your contribution.

The exchange rate tells us that 1 ETH = 100 REF which is calculated automatically. You'll also get 100 REF in bonus, since the presale bonus of 100% is added. At the 'YOU WILL GET" section you can see the exact amount of REF Tokens you're going to get for your contribution, which is **200 REF**.
If all the information is correct, press **Invest**.
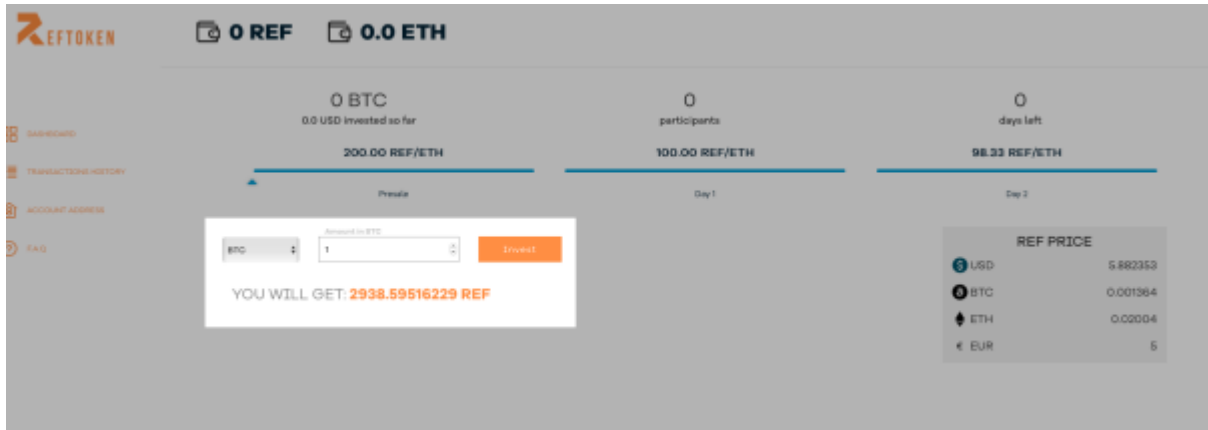

You then need to send the mentioned amount of ETH to the address provided to you.

Make sure to send proper tokens to the corresponding address. Never send the wrong currency to the provided address, otherwise, your contribution will be lost.

An email with all the transaction details will be sent to you. You can also see that the invoice expires in 24h and countdown lets you know how much time you have left. This transaction is added to the list in **Transaction history** with **Pending** status at first.
In case if your order has expired, we recommend that you create a new one.
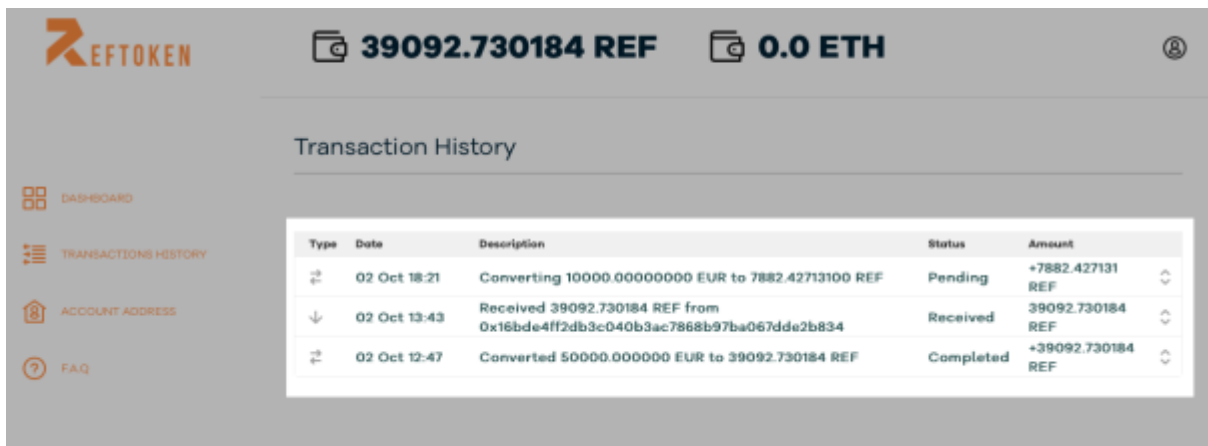

You can always check the current status of your transaction at the **Transaction History** page. That's it!

Don't hesitate to ask us for any clarification at contact@reftoken.io!
